

# ACI Fund Seminar on Bird Hazards, Geneva, 28-30 June 2004

The ACI Fund, in collaboration with Geneva International Airport (AIG) and the Swiss BTEE (Bureau de Travaux et d'Etudes en Environnement), at the request of ONDA-Morocco and OACA-Tunisia, held a seminar on bird hazards to aviation in Geneva, on 28-30 June 2004. Eleven airport employees from Cameroon, Côte d'Ivoire, Madagascar, Morocco, Romania, Tunisia and Togo took part in the course.

Participants benefited both from classroom discussions and actual intervention exercises at

Geneva International Airport. The issues covered by the course included notably: bird impacts during critical flight phases, forecast of the bird safety threat, dispersal methods and collection and analysis of data.

The dynamic and motivating teaching of Messrs Jacques Fritz (AIG), Stéphane Pillet (BTEE) and Patrick Jacot (BTEE) ensured a most successful seminar. This was the 20th seminar organized by the ACI Fund since its inception. ■
